

The offering of local services such as news and weather on a constant and ongoing basis is a real plus while on the road, and is also a service that is NOT offered by any traditional radio stations. To restrict XM's ability to offer this due to fears by the NAB would be a huge disservice to the local public. I personally love knowing that any time 24/7 I can dial up XM and get instant traffic and weather while on the road. This is a service ONLY offered by XM and no local broadcasters, so in the interest of the listening public please don't permit the NAB to bully out new and useful offerings.
